Restriction/Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-13; drawn to a method for determining properties of products from a combinatorial chemical library P using features of their respective building blocks, classified in class 702, subclass 19.
- II. Claims 14-40; drawn to a method, system, and computer program product for determining properties of combinatorial library products from features of library building blocks, classified in class 702, subclass 19.

The inventions are distinct, each from the other because:

The inventions Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04, M.P.E.P. § 808.01). In the instant case the different inventions directed to products and methods having different functions, different effects, and different modes of operations. Group I is a method for determining properties of products from a combinatorial chemical library, wherein the final step is mapping (i.e. step 7). Group II is a method, system, and computer program product for determining properties of combinatorial library, however, includes additional steps of 1) forming an input feature(s) vector(s); and 2) the final step of transforming the input features vectors. Thus, Group I and II have different functions, different effects (i.e. different results), and different modes of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

INVENTORSHIP AMENDMENT

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. §1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
